Publishing Office
Pergamon Press Ltd, Pergamon House, Bampfylde Street, Exeter EX1 2AH, England [*Tel.* (0392) 51558; *Fax* 425370].

Advertising and Subscription Offices
North America: Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.
Rest of the World: Pergamon Press Ltd, Headington Hill Hall, Oxford OX3 0BW, England [*Tel.* (0865) 794141; *Fax* 60285].

Published semi-monthly in 2 volumes

Subscription Rates
Annual Institutional Subscription Rate (1993): £874.00 (U.S.$1398.00). Sterling prices are definitive. U.S. dollar prices are quoted for convenience only, and are subject to exchange rate fluctuation. Prices include postage and insurance and are subject to change without notice. Members of the *American Mathematical Society* may order personal subscriptions at a concessional rate, details of this rate are available upon request.

Back Issues
Back issues of all previously published volumes, in both hard copy and in microform, are available direct from Pergamon Press offices.

PHOTOCOPYING INFORMATION FOR USERS IN THE U.S.A.

The Item-fee Code for this publication indicates that authorization to photocopy items for internal or personal use is granted by the copyright holder for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service provided the stated fee for copying beyond that permitted by Section 107 or 108 of the U.S. Copyright Law is paid. The appropriate remittance of $6.00 per copy per article is paid directly to the Copyright Clearance Center Inc., 27 Congress Street, Salem, MA 01970, U.S.A.
Permission for other use. The copyright owner's consent does not extend to copying for general distribution, for promotion, for creating new works, or for resale. Specific written permission must be obtained from the publisher for such copying.

The Item-fee Code for this publication is:
0097-4943/93 $6.00 + 0.00

Second class postage paid at RAHWAY NJ and additional mailing offices. Postmaster send address corrections to *Computers & Mathematics with Applications*, Pergamon Press Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

♾™ The paper used in this publication meets the minimum requirements of American National Standard for Information Sciences—Permanence of Paper for Printed Library Materials, ANSI Z39.48-1984.

List of Contents

NUMBER 1

E. Y. Rodin	1	Speed of publication—An editorial
Y. S. Sherif and **R. G. Dear**	3	The development and testing of a new composite random number generator
A. E. Köhler	17	A second approach to fuzzy symmetries: Fuzzy symmetry requirements
M.-Z. Qin and **W.-J. Zhu**	35	A note on stability of a three-stage difference scheme for ordinary differential equations
V. Moll	45	Polygonal approximation to the flow on the critical surface for the bistable equation
H. Wang and **R. P. Tewarson**	53	A quasi-Gauss-Newton method for solving nonlinear algebraic equations
H. De Meyer, C. Niyokindi and **G. Vanden Berghe**	65	The implementation of parallel Gram-Schmidt orthogonalisation algorithms on a ring of Transputers
J.-C. Yao	73	Abstract variational inequality problems and a basic theorem of complementarity
E. Asarin, P. Diamond, I. Fomenko and **A. Pokrovskii**	81	Chaotic phenomena in desynchronized systems and stability analysis
S. Namasivayam and **E. L. Ortiz**	89	Error analysis of the Tau Method: Dependence of the approximation error on the choice of perturbation term
J. Y. Choo and **D. H. Schultz**	105	Stable high order methods for differential equations with small coefficients for the second order terms

NUMBER 2

E. Y. Rodin	1	Speed of publication—An editorial
J. F. Andrus	3	Stability of a multi-rate method for numerical integration of ODE's
J. H. Reif	15	Efficient VLSI fault simulation
D. H. H. Yoon	33	The categorical framework of object-oriented concurrent systems
A. Marquina and **V. Martínez**	39	Shooting methods for 1D steady-state free boundary problems

H. Itakura 47 A solution to multiple linear regression problems with ordered attributes

A. Chattopadhyay and **T. R. McCarthy** 59 A multidisciplinary optimization approach for vibration reduction in helicopter rotor blades

J.-C. Luo 73 An incomplete inverse as a preconditioner for the conjugate gradient method

M. Mavronicolas 81 Efficiency of semi-synchronous versus asynchronous systems: Atomic shared memory

M. J. Chambers 93 A note on forecasting in co-integrated systems

M. Ainsworth and **J. T. Oden** 101 A posteriori error estimators for second order elliptic systems: Part 1. Theoretical foundations and a posteriori error analysis

T. F. Filippova 115 A note on the evolution property of the assembly of viable solutions to a differential inclusion

NUMBER 3

E. Y. Rodin 1 Speed of publication—An editorial

J. R. Mika and **J. M. Kozakiewicz** 3 First-order asymptotic expansion method for singularly perturbed systems of second-order ordinary differential equations

D. Bouchaffra 13 Theory and algorithms for analysing the consistent region in Probabilistic Logic

J. P. Fourie and **Y. Yavin** 27 The guidance accuracy of a projectile using a wind stabilized seeker

L. G. Reyna and **J. R. Soběhart** 37 Dynamics of two-level ions in a laser beam

B.-C. Chien, R.-J. Chen and **W.-P. Yang** 43 Analysis of the multigroup method for manipulating multiple stacks

M. S. Petković and **C. Carstensen** 59 Some improved inclusion methods for polynomial roots with Weierstrass' corrections

V. Pan 69 Binary segmentation for matrix and vector operations

M. K. El-Daou, E. L. Ortiz and **H. Samara** 73 A unified approach to the Tau Method and Chebyshev series expansion techniques

Y.-F. Tang 83 The symplecticity of multi-step methods

O. Rojo, R. L. Soto and **H. Rojo** 91 New eigenvalue estimates for complex matrices

J.-S. Guo and **J.-C. Yao** 99 The variational inequalities

L. Abolnikov and **J. H. Dshalalow** 107 Semi-regenerative analysis of controlled bulk queueing systems with a bilevel service delay discipline and some ergodic theorems

117 Book Reports

NUMBER 4

E. Y. Rodin	1	Speed of publication—An editorial
F. A. Mahmoud and **M. A. Saleem**	3	Regularization method for solving Radon integral equations
O. Rand	15	Limit cycles and stability of highly nonlinear periodic systems by harmonic variables
Y. Yavin, C. Frangos and **J. P. Fourie**	27	The performance of a projectile which uses a bang-bang type guidance law. Part 3—The point-mass model revisited
T.-C. Wu and **Y.-S. Yeh**	39	A conference key distribution system based on cross-product
Y. Yavin and **C. Frangos**	47	The performance of some manufacturing queueing networks when some of the machines are in the failure mode
D. A. Murio and **D. Hinestroza**	55	The space marching solution of the Inverse Heat Conduction Problem and the identification of the initial temperature distribution
P. Glaister	65	Second order accurate upwind difference schemes for scalar conservation laws with source terms
Z. Zhang	75	A shifted method for solving symmetric eigenvalue problems
Q. Lin and **J. G. Rokne**	87	A family of centered forms for rational functions
J.-C. Luo	95	A new class of decomposition for inverting asymmetric and indefinite matrices
B. Almasi and **J. Sztrik**	105	A queueing model for a non-homogeneous terminal system subject to BR992
	113	Book Reports

NUMBER 5

E. Y. Rodin	1	Speed of publication—An editorial
M. G. El Sheikh	3	The finite mixed Sturm-Liouville problems of the Dirichlet-Newton type
N. T. Long and **A.P.N. Dinh**	11	Periodic solution of a nonlinear parabolic equation involving Bessel's operator
L. Devroye	19	Records, the maximal layer, and uniform distributions in monotone sets
J. Parisi and **R. Stoop**	33	A possible scheme for classifying phase transitions in the generalized entropy spectrum of a nonhyperbolic system
J. P. Milaszewicz and **S. Abdel Masih**	43	Elimination and fixed point iterations

N. M. Temme	55	Asymptotic and numerical aspects of the noncentral chi-square distribution
F. S. C. Tseng, W.-P. Yang and **A. L. P. Chen**	65	Finding a complete matching with the maximum product on weighted bipartite graphs
N. G. Zamani and **W. Sun**	73	Enriched collocation finite element method, a model problem
J.-C. Luo	83	A sparsity for decomposing a symmetric matrix
S. Arunkumar and **T. Chockalingam**	91	Genetic search algorithms and their randomized operators
D. Hinestroza and **D. A. Murio**	101	Recovery of the transient heat transfer coefficient in the nonlinear boundary value problem for the heat equation
J.-C. Luo	113	Extended concept of stair-shape sparsity for the inverse of an asymmetric matrix

NUMBER 6

E. Y. Rodin	1	Speed of publication—An editorial
A. McIntosh and **J. Brodbelt**	3	The natural representation of real numbers
C. N. Zhang	15	An improved binary algorithm for RSA
H. Inoue, Y. Shibata and **H. Miyazaki**	25	Generation of interpolation curves with the least energy using dynamic programming
F. Di Benedetto, G. Fiorentino and **S. Serra**	35	C. G. preconditioning for Toeplitz matrices
J. R. González de Mendívil and **J. R. Garitagoitia**	47	A model for deadlock detection based on Automata and Languages Theory
D. White and **A. P. Wang**	57	An algebraic characterization of fixed modes in a decentralized control (A simplified existence proof)
W.-J. Zhu and **M.-Z. Qin**	61	Order conditions of two kinds of canonical difference schemes
D. Greenspan	75	Electron attraction and Newtonian methodology for approximating quantum mechanical phenomena
P. Diamond and **P. Kloeden**	85	Spatial discretization of mappings
T. E. Simos	95	A Runge-Kutta Fehlberg method with phase-lag of order infinity for initial-value problems with oscillating solution
P. Johnstone and **F. E. Petry**	103	Rational number approximation in higher radix floating point systems
H. T. Liaw, S. J. Wang and **C. L. Lei**	109	A dynamic cryptographic key assignment scheme in a tree structure

NUMBER 7

E. Y. Rodin	1	Speed of publication—An editorial
M. Kolář and **S. F. O'Shea**	3	Fast, portable, and reliable algorithm for the calculation of Halton numbers
P. J. Looges and **S. Olariu**	15	Optimal greedy algorithms for indifference graphs
S.-M. Yen and **C.-S. Laih**	27	The design of dynamic access control scheme with user authentication
M. K. El-Daou and **E. L. Ortiz**	33	Error analysis of the Tau Method: Dependence of the error on the degree and on the length of the interval of approximation
B. Kumar Datta	47	The approximate evaluation of certain integrals
E. L. Allgower, C.-S. Chien and **W.-C. Lee**	51	Bifurcations of corank greater than two
E. L. Allgower and **C.-S. Chien**	65	Continuation-minimization methods for stability problems
M. Tadi	81	Finite elements for modeling and control of a Mindlin plate
	101	Book Reports

NUMBER 8

E. Y. Rodin	1	Speed of publication—An editorial
R. P. Agarwal and **B. S. Lalli**	3	Discrete polynomial interpolation, Green's functions, maximum principles, error bounds and boundary value problems
P. Glaister	41	Cylindrically symmetric flows in a Lagrangian frame
M.-H. Chou	47	A modified cell-to-cell mapping method for nonlinear systems
D. Hinestroza and **D. A. Murio**	59	Identification of transmissivity coefficients by mollification techniques. Part I: One-dimensional elliptic and parabolic problems
Z. Chen	81	Projection finite element methods for semiconductor device equations
Y.-F. Tang	89	Non-conservativity of traditional schemes for Liouville and contact systems
M. H. Lee	95	The reduction of solutions of some integrable partial differential equations
H.-B. Shu	101	A new approach to generating functions for contact systems
S. R. Grace and **B. S. Lalli**	107	Oscillation theorems for second order nonlinear functional differential equations with damping
	115	Software Reports
	117	Expert Choice Version 8.0

NUMBER 9

E. Y. Rodin	1	Speed of publication—An editorial
V. Pan and **J. Reif**	3	Generalized compact multi-grid
C.-R. Jou and **J.-C. Yao**	7	Algorithm for generalized multivalued variational inequalities in Hilbert spaces
D. B. Panton	17	Distribution function values for logstable distributions
V. Pan, A. Sadikou, E. Landowne and **O. Tiga**	25	A new approach to fast polynomial interpolation and multipoint evaluation
I. P. Boglaev and **V. V. Sirotkin**	31	The solution of singularly perturbed hugh problems via domain decomposition
D. S. Negi and **E. S. Lee**	43	Possibility programming by the comparison of fuzzy numbers
J. L. Cruz Soto, M. C. Calzada Canalejo, M. Marín Beltrán and **E. Fernández-Cara**	51	A parallel algorithm for solving the incompressible Navier-Stokes problem
A. P. Wang	59	An inverse problem of reflection
A. E. Köhler	67	Isosymmetric manifolds in form spaces and the normal deformations of polygonal forms
K.-L. Chung and **W.-M. Yan**	91	Solving the symmetric tridiagonal eigenvalue problem on hypercubes
I. Fogg and **M. Orlowska**	97	Valid unbiased fragmentation for distributed database design

NUMBER 10/11

GLOBAL OPTIMIZATION, CONTROL AND GAMES, II

E. A. Galperin	ix	Preface
A. G. Ferreira and **J. Zerovnik**	1	Bounding the probability of success of stochastic methods for global optimization
R. Tu and **Q. Zheng**	9	Integral global optimization method in statistical applications
P. E. M. Borm, M. J. M. Jansen, J. A. M. Potters and **S. H. Tijs**	19	Pareto equilibria for bimatrix games
M. M. Kostreva	27	Combinatorial optimization in Nash games
N. Dubois and **D. de Werra**	35	EPCOT: An efficient procedure for coloring optimally with Tabu search

A. Ferrari and **E. A. Galperin**	47	Numerical experiments with one-dimensional adaptive cubic algorithm
R. E. Moore	57	The resolution of close minima
E. R. Hansen and **G. W. Walster**	59	Bounds for Lagrange multipliers and optimal points
E. A. Galperin	71	The alpha algorithm and the application of the cubic algorithm in case of unknown Lipschitz constant
Q. Zheng	79	Discontinuity and measurability of robust functions in the integral global optimization
R. T. Yanushevsky	89	Lyapunov's functionals and related optimal problems for differential-difference systems
E. A. Galperin and **Q. Zheng**	103	Solution and control of PDE via global optimization methods
E. A. Galperin, Z. Pan and **Q. Zheng**	119	Application of global optimization to implicit solution of partial differential equations
E. R. Hansen and **G. W. Walster**	125	Nonlinear equations and optimization
E. A. Galperin	147	The fast cubic algorithm
Ch. Deissenberg	161	The global failure of local preference optimization
E. A. Galperin	173	Validity of feedback controls depending on higher order derivatives
R. E. Moore	187	Erratum to "Global optimization to prescribed accuracy"

NUMBER 12

E. Y. Rodin	1	Speed of publication—An editorial
M. S. Yang	3	Convergence properties of the generalized fuzzy c-means clustering algorithms
A. J. Meir	13	The equations of stationary, incompressible magnetohydrodynamics with mixed boundary conditions
W.-J. Zhu and **M.-Z. Qin**	31	Constructing higher order schemes by formal power series
A. De Santis, A. Germani and **C. Scoglio**	39	Kalman filter approach to solution of rational expectations models
N. Iraniparast	49	Shaking a forced string to rest
J. S. H. Tsai, S. S. Chen and **L. S. Shieh**	55	Generalized matrix Euclidean algorithms for solving Diophantine equations and associated problems

C. Z. Janikow, H. Cai and **X. Luo**	73	An approximate algorithm for estimating treatment lags from right censored data
S. Sur and **P. K. Srimani**	87	Topological properties of star graphs
G. Dattoli, C. Chiccoli, S. Lorenzutta, G. Maino, M. Richetta and **A. Toree**	99	Graf-type theorem for Laguerre and Legendre functions
	107	Book Reports
